ACCOMPLISHMENT REPORT ON PROJECT DREAM
(Disaster Resilience Education and Advocacy for MSES)

I. Introduction

The safety of schools is important and DRR aims at reducing the vulnerability to, and impact of disasters on schools. It prepares both teachers and students for potential disasters, thereby reducing the impact of said disaster. As emergencies and disasters, along with their destructive effects, are rising all over the world acquiring knowledge and its uses are regarded as the most effective way to prevent disasters or reduce its effects with the advancement in technology. Disaster education for vulnerable aims to provide knowledge, skills, motivation in individuals and groups to take actions to reduce their vulnerability to disasters. A school with adequate plan for disaster management, which was prepared through a participatory technique and properly integrated into the policies and plans of the community as a whole has major advantages over schools that don't. The level of effective management of disaster might be solely dependent on this plan.

In line with the implementation of DepEd Order No.83, s. 2011 entitled Disaster Preparedness Measures for Schools and DO No. 21, s. 2015 entitled Disaster Risk Reduction and Management Coordination and Information Protocol. Based on the data recorded there are 122 or 39.86% of learners have low level of understanding on the hazards, awareness on safety and preparedness of potential risk. In response to this, capacitating the school personnel is important nowadays in order to strengthen learners' disaster preparedness. Likewise, Marinig South Elementary School will implement the Project DREAM to continuously increase the level of understanding on the hazards, awareness on safety and preparedness of potential risk.

II. Highlights of accomplishment

Marinig South Elementary School particularly Grade Six learners conducted a classroom-based training under Project DREAM (Disaster Resilience Education and Advocacy for MSES) with the theme "Be Alert & Respond: A Basic First Aid Training for Grade 6 Pupils".

Ms. April K. Terrenal was the resource person on the said activity. The speaker also discussed ways to treat heat exhaustion that might happen in

school and their respective houses. We believe that first aid training will be a valuable asset for our learners. It will surely equip them with the basic skills for emergency situations and provide them with a better understanding of how to respond in emergency scenarios.

The activity was held on May 04, 2023, at Marinig South Elementary school.

We all know that First aid in schools is especially helpful as children often get into accidents that can need swift care to prevent things from escalating. Whether it's a minor injury or something more serious like a fracture, preventing further complications is paramount. Through the help of our teacher, sir Edgar G. Aquino, he discussed the basic things about first aid and bandaging to Grade 6 pupils at Marinig South covered court on April 29, 2023.

The Project DREAM also wanted to ensure the safety learning environment for the pupils of Marinig South Elementary school. Regular maintenance efforts such as repairs, updating safety features, and upkeep of the facility can ensure that students and staff have a safe and comfortable environment to learn and work in. The school replaced the garden fence from old grills, removed the unsafe gutter of covered court. Also, the school repair the school fence and stage.

III. Ways forward

- A. Purchased of Emergency Kit/ Materials: Provision and Distribution of training materials and equipment intended for the training.
- B. Small Group Discussion: Crafting of school-based contingency and management plan. Delivered the program on how to craft and revisit school-based policies about contingency and management plan.
- C. Feedbacking/Evaluation: Evaluate DRRM Activities, Accomplishment report and Adjusted plan.
- D. Training: Activities that will help to widen knowledge in Risk Preparedness.
