SCHOOL LIBRARY

Library is a place where books, magazines, and other materials are available for people to use or borrow. It is considered as the heart of the school. The primary function of a library is to assist in accessing information and gathering knowledge. Collection development is the central professional function of any library since the very concept of a library is primarily associated with the idea of collection. Thus, learners often visit the library for lessons on how to evaluate websites, avoid fake news and plagiarism, access district databases and cite resources. Learners love the library. They gather in crowds in the morning, lunch, after school, and whenever they can.

School Library is one of the important facilities in a school. Its mission is to ensure that students and staff can gather ideas and information. It provides access to materials in all formats and helps increase student's interest in reading, viewing, and using information and ideas. At first, our school library was located at Marcos building (front part of MSES) but it was demolished in 2017. Therefore, it is now located at the 2nd floor of ETOKARUNUNGAN building. It is considered as a semi-functional library. Learners and teachers have access on it and use it for their assignments, research works and others, as far as accessing information and gathering knowledge are concerned.
